Answer QUESTION 3 PARTS A and B on this page.

PART A

$$\text{AROC} = \frac{100-90}{2-0} = \frac{10}{2}$$

ROC ≈ 5 words per minute

PART B

Yes there would be a value c, for which R(c)) = 155, There is an infinanty possibility of numbers between 8-10 where R(t) would end up at 150.

Use a pencil or a pen with black or dark blue ink. Do NOT write your name. Do NOT write outside the box.

Answer QUESTION 3 PARTS C and D on this page.

PART C

$2\left(\frac{10}{2}\right) + 6\left(\frac{150}{6}\right) + 2\left(\frac{162}{2}\right)$

$2(5) + 6(25) + 2(81)$

$10 + 150 + 162$

322

$2\overline{)162}$ = 81, 16

$6\overline{)150}$ = 25, 12, 30

$25 \times 6 = 150$

$81 \times 2 = 162$

$162 + 150 + 10 = 322$

The approximate value is 322

PART D

$\int_0^{10} -\frac{3}{10} + {}^2 + 8t + 100$

Use a pencil or a pen with black or dark blue ink. Do NOT write your name. Do NOT write outside the box.
